

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**  
**Monitoring Reporting Requirements Not Met for**  
**BERKELEY SPRINGS CITY OF WV3303301**

Our water system violated drinking water monitoring requirements. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

*We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.*

**What should I do?**

At this time, there is nothing you need to do.

The table below lists the monitoring we did not conduct, other violations, and the associated compliance period.

**What happened? What is being done? (Describe corrective action)**

Samples were collected and sent to a state certified lab to be tested. Upon completion of testing the lab had failed to submit results of testing to the state office in the required allotment of time, which ultimately led to a Monitoring Violation by the state as BSWW being the responsible party.

After contacting our lab representative, they plan to forward all results within their records to resolve any issues and set forth procedures to prevent situations like this in the future.
